### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The election filed October 5, 2004 has been entered and made of record as paper no. 1004.

Applicant's election without traverse of claims 1-16 in the reply filed on October 5, 2004 is acknowledged.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Arimura et al.

Arimura discloses in figure 7F a semiconductor device comprising a source (13s), a gate (6), a drain (13d), a single deep-pocket ion implant (15) in the source-drain depletion region, and a single shallow-pocket ion implant (10) in the source-drain depletion region. Note the teachings of the depletion region from line 20 of column 1 to line 42 of column 2 and line 33 of column 7 to line 43 of column 7.

In re claims 2-4, as shown in figure 7F, both of the pockets in Arimura are asymmetric with respect to a central axis of the semiconductor device.

In re claims 5-8, figure 1A clearly shows that the pockets can be formed on both the drain side and the source side.

In re claims 9-16, since the ion implantation are overlapped with each other as shown in figures 6A-6F, the secondary pocket ion implant inherently countered by ions of the source and drain regions.

The other references are cited to show other structures pertinent to Applicants' disclosure.

Paper copies of cited U.S. patents and U.S. patent application publications will cease to be mailed to applicants with Office actions as of June 2004. Paper copies of foreign patents and non-patent literature will continue to be included with office actions. These cited U.S. patents and patent application publications are available for download via the Office's PAIR. As an alternate source, all U.S. patents and patent application publications are available on the USPTO web site ([www.uspto.gov](http://www.uspto.gov)), from the Office of Public Records and from commercial sources. Applicants are referred to the Electronic Business Center (EBC) at <http://www.uspto.gov/ebc/index.html> or 1-866-217-9197 for information on this policy. Requests to restart a period for response due to a missing U.S. patent or patent application publications will not be granted.

Any inquiry concerning this communication should be directed to Examiner Ngan Ngo at telephone number (571) 272-1711. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
